Experience

2023 Summer Orientation Leader

Employed by the LGBTQ Center at the University of North Carolina at Chapel Hill

- Display table set-up, clean-up, and maintenance during two-hour orientation sessions.
- Greet and engage with students. Discuss resources for LGBTQ students, upcoming events, and methods of involvement. Give out Pride-themed merchandise.
- Maintains the LGBTQ Center Library. Utilizes TinyCat catalogue system to shelf books according to subject and alphabetized by author surname.

BeAM Makerspace System Analysis – Chapel Hill, NC

- Scrum Master to a team of six people. Managed sprints, created GANTT and burndown charts, organized team meetings, ensured continuous communication with client.
- Created models such as affinity diagrams, flow models, day-in-the-life models, personas, artifact models, and more to aid UNC's BeAM Makerspace in resolving limitations pertaining to their reservation system.

Product Management – Chapel Hill, NC

- Collaborated with two colleagues to design an app that can help troubled teens find regional communities.
- Co-authored a 26-page product proposal in a week that consisted of a summary, user personas, a work plan calculated using the PERT formula, feasibility analyses (schedule, operational, technical, economic), functional and non-functional requirements, and a user questionnaire. Presented proposal to the class.
- Co-authored a write-up detailing user journey through the app via an interactive prototype. Presented interactive prototype to the class.

Application Design – Chapel Hill, NC

- Redesigned the ConnectCarolina Student Center interface for class. Authored a write-up detailing problematic navigation, lackluster usability, and poor aesthetic design. Used Balsamiq for wireframes.
- Created wireframes for an application designed for high school alumna to stay connected and plan events.
- Created a video game using the RenPy engine. Complete with sprites and original music compositions.

Web Design – Chapel Hill, NC

- Designed a multi-page resume website. Includes email obfuscation and JavaScript last-updated time stamp.
- Coded a website's homepage from scratch using HTML and CSS. Design follows a cyberpunk aesthetic.
- Designed two multi-page portfolios, one for work and one for personal creative projects.
